

Mobile

Access your instance from anywhere using the Now Mobile, Mobile Agent, and Mobile Onboarding apps on your mobile device.

Download the native mobile apps:

ServiceNow provides three mobile apps, each designed for a specific set of users. Download these apps for your Android or iOS devices using the Google Play store or Apple app stores.

Get started using base system applications:

Take advantage of pre-configured mobile applications to get your users started with commonly used functionality like approvals or field service management.

Use the native features on your mobile device:

ServiceNow apps can use your mobile devices native features to make calls, send SMS messages, and display navigation information. Use the camera on your mobile device to scan barcodes, create image attachments, or use photo search to get assistance quickly.

Use Studio to create custom applications:

Build applications tailored to your organization's specific needs. With [Studio](#), you can quickly create applications in a simple, low code interface.
