

Software Asset Management

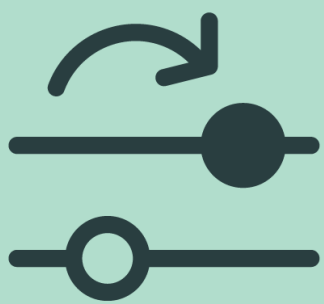

Simplify your asset management with ServiceNow Software Asset Management, which offers the only single-architecture platform for ITIL.

Normalize software asset

Automatically normalize your software assets with updates from the Software Asset Management content service.

Leverage publisher pack integrations

Use license metric data for specific software publishers to accurately track your software usage.

View your license position

Use the License Workbench to easily see your license compliance position and resolve any issues with your license compliance.

Import your organization's entitlement data

Upload all your entitlement data in a Microsoft Excel spreadsheet to quickly add your entitlement information to the Now Platform.

Track software spend

Automatically identify software spend transactions in your organization to track spending over time.
